When One Frock Serves for Two WIO'S WIO-and

INDORSED BY AMERICAN LEGION

Establishment of soldiers' community settlements through reclamation of cut-over timberlands and wet lands of the South, irrigation of arid ands in the West, and development of other unutilized lands throughout the country, as contemplated in the Mondell bill, is indorsed by the American Legion, the great organization of world war veterans of this country, for membership in which 4,000,000 men are eligible.

At a joint meeting in New York of the executive committee of the Paris and St. Louis caucuses of the American Legion the Mondell bill was approved in principle,

By authority of the meeting legislative representatives of the Legion are in Washington to do what they can to further the enactment of the legislation. The legislative committee is made up of Col. Luke Lea (portrait herewith), formerly United States sena-

tor from Tennessee, and Col. T. W. Miller, who was formerly a member of the house of representatives from Delaware.

The general idea in the bill is to set returned soldiers at the work of reclaiming these semiarid, cut-over and overflowed lands, pay them for their work and sell them reclaimed lands on long time, with such financial assistance as may be necessary to give them a good start. The community settlement is an important feature of the plan.

WHY DOES COAL KEEP GOING UP?

Senator Joseph S. Freylinghuysen of New Jersey offered a resolution (S. Res. 126) the other day in substance as follows:

Whereas for several years the price of coal to the consumer has from time to time been largely increased; and

Whereas for a period this increase in price was attributed to existing war conditions; and

Whereas in spite of the fact that since the armistice was signed, November 11, 1918, normal peace conditions have prevailed, the price of coal has continued to rise, without any apparent economic or other proper reason therefor: Therefore be it

Resolved, That the committee on interstate commerce, or any subcommittee thereof, be instructed to make inquiry into the cause or causes which have brought about the enormous increase in the market price of coal, and

to that end obtain full data regarding freight rates, wages, profits, and other matters bearing upon the question under consideration, with a view to determining who or what may be responsible for such increase in price, whether due to economic causes, and, therefore, proper and right, or whether due to manipulation or profiteering on the part of miners, shippers, or dealers in coal.

Resolved further, That the committee on interstate commerce shall report its findings to the senate, together with such recommendations as may be pertinent and advisable, with a view either to congressional or executive action. in order to remedy existing conditions or the punishment of any individual or corporation deemed guilty of unlawful acts.

HELEN TAFT, COLLEGE PRESIDENT

There's thunder for feminists in the career of Miss Helen Taft, only daughter of a former president, William Howard Taft. In 1917 Miss Taft was made dean of Bryn Mawr college, from which she had graduated only two years before. And the other day a dispatch announced that she had been elected president of the school to serve during the year's leave of absence granted Dr. M. Carey Thomas.

It wasn't long ago that Miss Taft made her social debut in the White House. Then a student at Bryn Mawr, she gave up her studies after her sophomore year and went to Washington where the weight of the social responsibilities of the White House fell upon her shoulders, as her mother was ill most of the time.

Her success as a hostess and soclety leader was acclaimed by the diplomatic circle in which she ruled. Popular with the women of Washington, the wives of congressmen, cabinet secretaries and members of the diplo-

matic corps put their heads together in an effort to choose her a husband. In this, however, Miss Taft herself didn't display much interest, Instead she returned that year to Bryn Mawr to complete her studies.

HE IS INSURED FOR \$4,500,000

The most heavily insured man in the United States is Rodman Wanamaker of New York and Philadelphia, of whom a portrait is given herewith. Mr. Wanamaker's policies aggregate Pierre Dupont of powder trust

fame follows with \$4,000,000. Next is John Wanamaker, Sr., founder of department stores, with policies aggregating \$3,000,000. J. Pierpont Morgan carries policies totaling \$2,500,000. In the \$2,000,-

Francis Dupont carries \$1,250,000. There are approximately 17 others in the United States whose insurance equals or exceeds \$1,000,000.

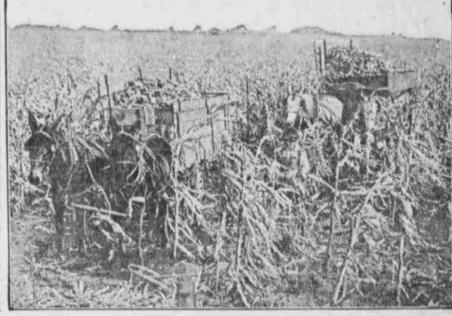

000 class are Julius Rosenwald of Chi-

cago and Percy Rockefeller, Henry

Policies of \$500,000 are common. There is scarcely a successful business man of the well-to-do class who does not carry upward of \$100,000.

The list of heavy insurers, however, gives some strange contrasts in the matter of individual insurance holdings, taken in ratio to reputed wealth. John D. Rockefeller, for instance, is listed as holding \$50,000 insurance, though it is probable that his policies exceed this amount.

FARMER HANDLES EVERY CORN EAR FIVE TIMES-LET HOGS HELP IN HARVESTING
